## **RESPONSE TO RCE**

1. This Office Action is in response to an RCE filed on 08/13/2007. Pursuant to the filing of the RCE, the prosecution in this case has been reopened. Claims 1, 4, 6, 8, 19, 22, 24, 26, 37, 39, 41-43, 47-49 and 53 are currently pending and have been examined in this Office Action.

### ***Continued Examination Under 37 CFR 1.114***

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous office action has been withdrawn pursuant to 37 CFR 1.114. The Applicant's submission filed on 08/13/2007 has been entered.

### ***Paper Submitted***

3. It is hereby acknowledged that the following papers have been received and placed of record in the file: **Information Disclosure Statement** as received on 08/13/2007 was considered. The documents listed in the IDS have been considered and it were found not to anticipate or render obvious, alone or in combination with other references, previously allowed claims 1, 4, 6, 8, 19, 22, 24, 26, 37, 39, 41-43, 47-49 and 53.

## REASONS FOR ALLOWANCE

4. Claims 1, 4, 6, 8, 19, 22, 24, 26, 37, 39, 41-43, 47-49 and 53, renumbered as 1-17, are allowable over the prior art of record.

The Examiner has found that the prior art of record does not appear to teach or suggest or render obvious the claimed limitations in combination with the specific added limitations as recited in independent claims and subsequent dependent claims.

One such prior art is the U. S. Patent No. 6,374,402, issued to Schmeidler et al. Schmeidler teaches, in part, a method of processing a data stream with a computer system, the method comprising: receiving the data stream using a browser application, detecting a content type of data in the data stream and temporarily overriding a default rendering process otherwise associated with the content type detected for the data in the data stream.

Another such prior art is the U. S. Patent No. 7,017,189, issued to DeMello et al. DeMello is directed to a system and a method for activating a rendering device, and teaches determining whether the browser application is invoked within an application environment of an internet service provider to enable a subscriber of the internet service provider access to an online resource.

However, neither Schmeidler nor DeMello, either separately or in combination, teach temporarily overriding the default rendering process identified in the registry of the computer includes changing the registry of the computer such that the default rendering process identified in the registry of the computer and associated with the content type of

Art Unit: 2155

data in the data stream is replaced with the particular rendering process if the browser application is determined to have been invoked within the application environment of the internet service provider.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance and/or Examiner's Amendment."
